$$3 \times_{1} = (21) \cdot (\frac{1}{-2}) - 5,5 = -5,5$$

$$\times \times_{2} = (21) \cdot (\frac{1}{4}) = 2 + 4 - 5,5 = 0,5$$

$$\times_{3} = 20 \cdot (\frac{1}{2}) = 8 \cdot 2 - 5,5 = \frac{4}{15}$$

$$\times_{4} = 0,5$$
